Seasonal Forecast Bulletin :

July-August- September(JAS) 2022

Issued :June 2022

المعهــد الوطنــي للرصــد الــجوي
National Institute of Meteorology

The analysis of current atmospheric circulation, sea surface temperature, ENSO phenomenon, dynamical and statistical models outputs show for (JAS) 2022

❖ Temperature trend

The different models agree in predicting a fairly high probability of « **the warmer than normal scenario** » during the next three months JAS 2022 across all the country.

Forecast	Temperature
INM	***
ECMWF	Above normal
IRI	Above normal Near normal over the extreme south-west
Météo-France	Above normal
C3S multi-system	Above normal
Most likely scenario	**Warmer than normal over all of the country**

❖ Precipitation trend

The models predict a « dry conditions » over all of the country during the next tree month JAS 2022.

Forecast	Precipitation
INM	**
ECMWF	Below normal
IRI	No signal
Météo-France	Below normal
C3S multi-system	Below normal
Most likely scenario	Drier than normal
